

Small ivory figures from St. Lawrence Island

The top figure (3.8 cm total H on a 1.5 cm perforated stem) has the right arm folded at the elbow in front of the chest and the left arm placed behind. The holes at the back of the head were possibly used to insert hair. Excavated by Oozevafeuk at Uyneq Point, Gambell. Figures at the bottom are 3.4 and 2.5 cm tall.
